

Explanation to Multiple Sklerosis (MS)

Punto de Vulcano Fleur ● is like an ulcer in the nerve channel supra orbitalis. Vulcano Fleur behaves like a vulcano that's why I named him such. From the beginning on this vulcano pumps a secretion into all nerve channels of the body and moves slowly within supra orbitalis nervus. Painfull or not Vulcano Fleur works always in the same way. Pulling away Vulcano Fleur is a simple thing for me to do. Afterwards the body needs nearly 10 months to destroy the complete infection in the nervous system.

All the best Fleur
